TECHNIQUE BY **VADREGRIGSBY**

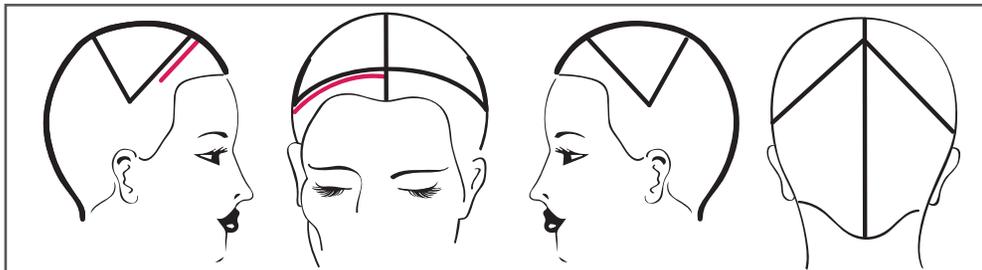

PRODUCTS USED: Pure Light Power Lightener, 20 Volume Developer, ChromaSilk 6.46, 10 Volume Developer, VIVIDS Wild Orchid, VIVIDS Green, VIVIDS Yellow.

1. Begin with the hair parted in the middle of the head. Mix Pure Light Power Lightener and prep for application.

2. Create a checkmark-like section. Start one inch behind the front hairline, and section the hair diagonal back towards the nape of the neck, and then up towards the crown. Repeat on the other side of the head. In the middle top of the back, the sections will not meet and may not end at the same levels. Join these two sections and clip hair out of the way.

3. Beginning on the left side take about a 1/4" thick slice of hair along the parting, mimicking the diagonal back angle already created. Apply the Pure Light mixture scalp to ends on foil.

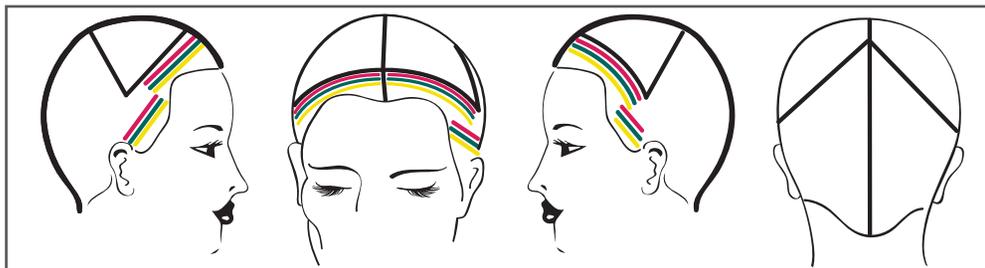

4. Repeating this angle, take a second slice of the same thickness right below the previous slice and apply Pure Light Power Lightener on foil.

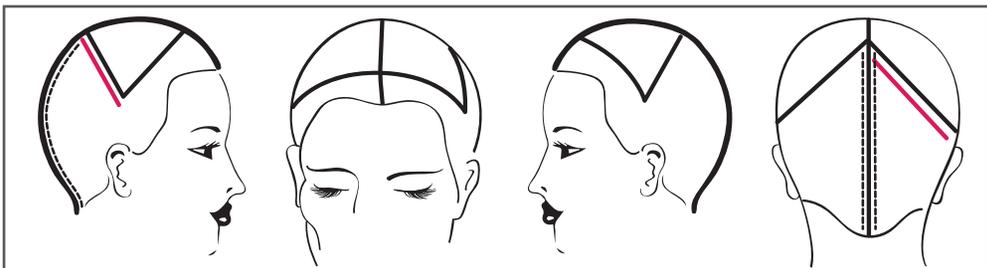

5. Take a third slice again at the same angle below the previous slice and apply the Pure Light Power Lightener mixture scalp to ends on foil.

6. Maintaining the same angle, drop down 1" and move into the side of the head. Clip this hair up and away. Repeat the 3 slices taken in steps 3, 4, and 5.

7. Create this pattern on the other side of the head.

8. Starting in the back where the original section is angled towards the top of the head, take a 1/4" thick slice along the parting and mimic the angle already created. Apply the Pure Light Power Lightener mixture.

9. Repeating this angle and below the previous slice, take a second slice of the same thickness and apply the Pure Light Power Lightener on foil.

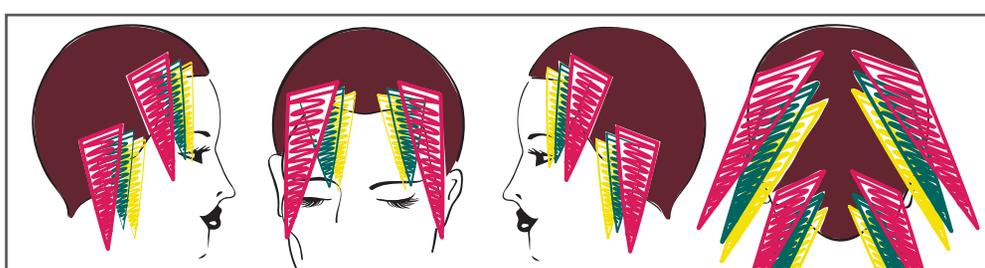

10. Take a third slice at the same angle, below the previous slice and once again apply the Pure Light Power Lightener mixture scalp to ends on the foil.

11. Maintaining the same angle, drop down 1" and clip this hair up and away towards the top.

12. Create this pattern on the opposite side of the back of the head. Once the foils are all placed, there should be 24 total.

13. Apply the 3 shades of VIVIDs to each lightened sliced section. Repeat the pattern, applying 1 slice with VIVIDs Wild Orchid, 1 slice with VIVIDs Green and 1 slice with VIVIDs Yellow. Apply base color to remaining hair. Process 20-30 minutes. Shampoo lightly with VIVIDs Color Protect. Rinse with cool water. Dry and Style.

14. For additional VIVIDs color through the top, add three slices of VIVIDs Wild Orchid, Green, and Yellow to pre-lightened hair an inch behind the last foil in the first set.
